Topics covered:	<ol style="list-style-type: none">Introduction to IPRCopyrights

A Seminar on **Intellectual Property Rights (IPR)** was conducted on 31-10-2020 by **Vijaya Institute of Pharmaceutical Sciences for Women**. After the inauguration ceremony, Mrs. V. Vandana, Assoc. Professor, Science & Humanities welcomed the gathering by giving a brief introduction about the resource persons, **Dr. P. Subbaiah**, Professor, Vijaya Institute of Technology for Women, Vijayawada and **Dr. G.V. Adi Lakshmi**, Asst. Professor Vijaya Institute of Technology for Women, Vijayawada.

Dr. P. Subbaiah delivered a talk on "Introduction to IPR". A patent is recognition for an invention that satisfies the criteria of global innovation, and industrial application. IPR is essential for better identification, planning, commercialization, rendering, and thus the preservation of inventions or creativity. Each industry should develop its speciality based on its IPR policies, management style, strategies, and so on. Currently, the pharmaceutical industry has an emerging IPR strategy, which needs better focus and outlook in the coming era. From this session students gained knowledge about basics of IPR and the various governing authorities throughout the world.

Post tea break **Dr. G.V. Adi Lakshmi**, addressed the audience on “Copyrights”. Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself. A copyright is subject to limitations based on public interest considerations, such as the fair use doctrine in the United States. Copyrights can be granted by public law and are in that case considered "territorial rights". This means that copyrights granted by the law of a certain state, do not extend beyond the territory of that specific jurisdiction. Copyrights of this type vary by country; many countries, and sometimes a large group of countries, have made agreements with other countries on procedures applicable when works "cross" national borders or national rights are inconsistent. In this talk students gained the knowledge about process of obtaining copy rights for the products formulated in various industries across the globe. Followed by scientific sessions a Q and A session was conducted. Over 126 participants attended the seminar and Convener and Principal, Prof. K. Padmalatha urged the audience to make use of the essential information in their research works followed by vote of thanks was given by Mrs. V. Vandana.

“A Webinar on Comprehensive Prospects of Pharm.D; Drug Safety and Entrepreneurship”, was organized by Department of Pharmacy Practice of *Vijaya Institute of Pharmaceutical Sciences for Women* on 26 & 27 June 2021. **Dr. G. K. Sadagoban**, Faculty of Pharmacy, JSS College of Pharmacy, Ooty, Tamil Nadu, PIN – 643001, **Dr. Karthik Rakam**, Medical Advisor, Arintra Inc, USA, **Dr. Arshiya Banu Syeda**, Operations Specialist, SME (Subject Matter Expert), IQVIA, Bangalore 560 103 & **Dr. M. Mallesh, Founder**, Director & CEO, OXYLUS Nutraceuticals Pvt. Ltd., Hyd., India were invited as Guest Speakers. **Prof. Dr. K. Padmalatha**, Principal was the convener of the webinar and **Dr. Purushothama Reddy K** Associate Professor & HOD, Department of Pharmacy Practice was the coordinator of the webinar. The webinar was inaugurated by Mrs. V. Vishnu Vandana Devi and the keynote address was delivered by Dr. Purushothama Reddy K.

Post inauguration **Dr. G. K. Sadagoban** delivered a talk on “**Role of Pharmacist in Pharmaceutical care and Drug safety**”. Where, the talk has begun with explaining the fundamental aspects of Pharmaceutical care and Drug safety. Further, special emphasis was given on Pharmaceutical care aspects involved in Patient care and drug safety, Pharmaceutical care in clinical practice at bed side of the patient as well as in clinical setting (OP) etc.,. Furthermore, delegates were detailed about various aspects of Pharmaceutical care and Drug safety in present scenario. By the end of session delegates gained knowledge about the challenges that are faced by pharmacist in Pharmaceutical care and Drug safety at practice by individuals were discussed which they are experienced.

The second talk was given by **Dr. Karthik Rakam** on “**Carrier in Startup and Entrepreneurship**”. In this talk special emphasis was given on Pharm.D graduates Entrepreneurship and Startup by a brief discussion on Entrepreneurship process and its importance especially in Pharma industry by Pharm.D graduates, Start-up Company plans, business organization establishment and motivation of Pharm.D students to plan their own Start-up/business and become as entrepreneurs. He shared his plans and said about exiting Start-up Companies, their requirements in detail.

The third talk was given by **Dr. Arshiya Banu Syeda** on “**Pharmacovigilance – A leading career option**”. Where, in this talk special emphasis on job opportunities after Pharm.D, comparatively in Government and Private sectors. Further attention was given on why to choose a carrier in Pharmacovigilance industry and a brief about PV during Covid – 19, Pharmacovigilance basic concepts to understand the job roles in PV. A special talk on what is the role of Pharm.D graduates in PV Profession, how to grab, what to do, how to do, ADE assessment and reporting etc., were very clearly explained by speaker. Finally a talk on who hires PV professionals, job searching strategies for desired candidates, skills required for PV jobs, carrier planning etc., were discussed.

And the final walk was given by **Dr. M. Mallesh** on “**Developing Entrepreneurial Skills in Pharm.D Students**”. He said about entrepreneur definition and basics, difference between the entrepreneur and the innovator, startup and entrepreneur role in business of anything, history of development of Entrepreneurship and Startup, business vs job as a carrier, types of entrepreneur, characteristic of entrepreneur, employee vs entrepreneur, types of Entrepreneurships, types of companies in detail for better understanding of students. Finally explained how to be become as an entrepreneur, process of Entrepreneurship and Startup, Women in Entrepreneurship, Pharma Entrepreneurship and Startups with examples including about his Nutraceutical Pvt. Ltd. namely OXYLUS.

Vote of thanks was given by Dr. Purushothama Reddy K. a total of 160 participants attended the webinar and it was conducted through the online platforms of zoom and you tube.

ABOUT THE WEBINAR :

The webinar is envisioned to direct Pharm.D graduates to empower themselves to understand and designate their choice of career interests to achieve better outcomes in patient care and contribute to the nation's health policy. The graduates will be enriched with proficiency in Drug Safety, Clinical Research, Pharmacovigilance and Pharmacoepidemiology. The webinar provides a platform to learn the brand-new concepts of nutraceutical world and entrepreneurship opportunities for Pharm.D and Pharmacy graduates. No medicine is completely safe to use, each drug molecule has its own its own merits and demerits while acting on the human body. Drug Safety or Pharmacovigilance monitors these abnormalities and identifies the hazards associated with pharmaceutical products while minimizing the risk.

Entrepreneurship in Pharmacy Practice is viewed as an innovative career option, generally entailing risk beyond what is normally encountered in starting a business, which may include other attributes, other than mere financial gains. Pharma Entrepreneurship is associated with the establishment of Community Pharmacies and business management. However, entrepreneurship and its key skills include the development of a range of health services in community and hospital sectors. In terms of Pharmacy Practice, entrepreneurship is associated with the motto of service and social responsibility, the essential qualities of a Pharm D practitioner.

PROGRAM SCHEDULE

Day 1

Date : 26-06-2021

Session I

Time : 10:00 am - 11:00 am

Speaker : **Dr. G. K. Sadagoban**

Faculty, Dept. Pharmacy Practice

JSS College of Pharmacy, Ooty

JSS Academy of Higher Education & Research

Founder & Moderator – Pharm D Info

Topic : **Role of Pharmacist in Pharmaceutical Care and Drug Safety**

Session II

Time : 11:00 am - 12:00 noon

Speaker : **Dr. Karthik Rakam**

Founder, Pharm Doctors

President, Pharmacon Society for Pharmacy Practice

Medical Advisor, Arintra Inc., USA

Topic : **Career in Startups and Entrepreneurship**

Day 2

Date : 27-06-2021

Session I

Time : 10:00 am - 11:00 am

Speaker : **Dr. Arshiya Banu Syeda**

Operations Specialist, SME

Topic : **Pharmacovigilance- A Leading Career Option**

Session II

Time : 11:00 am - 12:00 noon

Speaker : **Dr. Mallesh Mandha**

A one day Webinar on **IPR & Regulatory Guidelines in Various Countries** was organized by Institution Innovation Council (IIC) of *Vijaya Institute of Pharmaceutical Sciences for Women* on 17-07-2021. **Dr. V. Sai Kishore**, Head of Pharmaceutics Dept. Bapatla College of Pharmacy, **Mr. S. V. Suresh Babu**, Deputy Manager, Regulatory Affairs Eywa Pharma Pvt Ltd, Chennai and **Mr. I.V. Suman Kumar**, Senior Manager, Regulatory Affairs, Eisai Pharmaceuticals India Pvt Ltd, Visakhapatnam were invited as Guest Speakers. **Prof. Dr. K. Padmalatha**, Principal was the convener of the webinar; **Dr. S. Venkateswara Rao** and **Dr. Sivadasu Praveen** were the coordinators of the webinar. The webinar was inaugurated by Mrs. V. Vishnu Vandana Devi and the keynote address was delivered by Mrs. B. Hemalatha.

Post inauguration **Dr. V. Sai Kishore** delivered a talk on **Regulatory Considerations in New Drug Development Process**. Where, the talk has begun with explaining the fundamental aspects of intellectual property and Regulatory affairs. Further, special emphasis was given on various regulatory aspects involved in developing a new drug or new drug product, different stages of pre-clinical and clinical trials and marketing strategies of the new drug product. Furthermore, delegates were detailed about various applications that are required to introduce a new drug into the market. By the end of session delegates gained knowledge about the challenges that are faced by pharmaceutical industries in developing a new drug or a new drug product and different applications that are required to be filed in various countries to introduce the drug or drug product in the market.

The second talk was given by **Mr. S. V. Suresh Babu** on **Generic Drug Product Development, Regulatory Registration and Post Approval Changes**. In this talk special emphasis was given on developing, registering and the changes that have to be made after approval. Generic drugs are medicinal products that can be manufactured and marketed by others than the innovator company after the original patents have expired. Different countries established different procedures in approving this generic drug products and the main aim of establishing this policies are to increase the global access to and regulation of generic drugs, reduce drug costs, and prevent drug shortages and supply disruption. Particularly, the availability of low-priced generic drugs is important to increase the economical access to drug treatment in low- and middle-income countries. By the end of talk delegates had got an access

Mail: vijayapharmacyfw@gmail.com

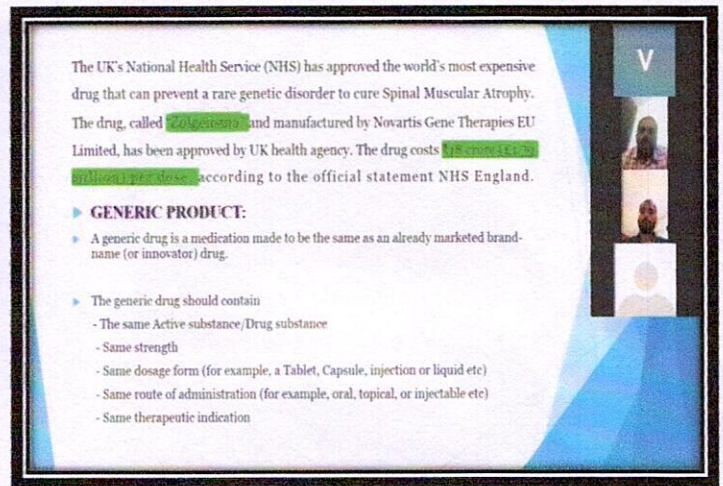

to information about development and registration process of generic drug products in different countries.

The third talk was given by **Mr. I.V. Suman Kumar** on **Regulatory Pathway for Generic Drugs in Japan**. Where, in this talk special emphasis on different regulatory guidelines followed by Japan to market the generic drugs. Generic drugs are interchangeable with original proprietary drugs, as they have the same active pharmaceutical ingredients, dosage forms, strength, quality, indications, effects, directions, and dosage. The cost of generic drugs is lower than original drugs, because the developmental cost is lower. The expansion of medical expenses is an important issue in many countries, including Japan, the USA, and Europe, and promotion of generic drugs has been demanded to solve this issue in Japan. Generic drug approval review in Japan is conducted by the Pharmaceuticals and Medical Devices Agency (PMDA), which reviews the equivalence of the original drugs from the viewpoint of quality, efficacy, and safety, based on documentation submitted by the generic drug applicants. From the session delegates gained knowledge about the different procedures that have to be followed to market a generic drug product in Japan.

Vote of thanks was given by Dr. Sivadasu Praveen. 250 participants attended the webinar, and it was conducted through the online platforms of zoom and you tube.

Dr. V. Sai Kishore giving a talk on Regulatory Considerations in New Drug Development Process on 17-07-2021

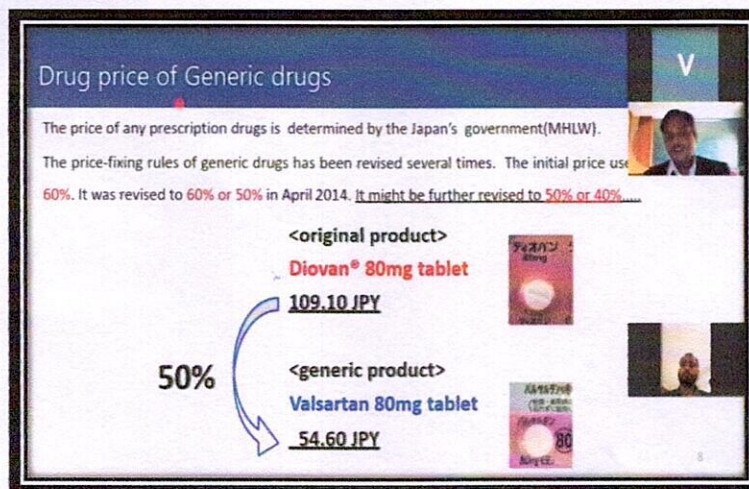

The UK's National Health Service (NHS) has approved the world's most expensive drug that can prevent a rare genetic disorder to cure Spinal Muscular Atrophy. The drug, called **SMN2** and manufactured by Novartis Gene Therapies EU Limited, has been approved by UK health agency. The drug costs **£1.8 million** by **18 months** according to the official statement NHS England.

▶ GENERIC PRODUCT:

- ▶ A generic drug is a medication made to be the same as an already marketed brand-name (or innovator) drug.
- ▶ The generic drug should contain
 - The same Active substance/Drug substance
 - Same strength
 - Same dosage form (for example, a Tablet, Capsule, injection or liquid etc)
 - Same route of administration (for example, oral, topical, or injectable etc)
 - Same therapeutic indication

Mr. S. V. Suresh Babu giving a talk on Generic Drug Product Development, Regulatory Registration and Post Approval Changes on 17-07-2021

Drug price of Generic drugs

The price of any prescription drugs is determined by the Japan's government(MHLW). The price-fixing rules of generic drugs has been revised several times. The initial price used to be 60%. It was revised to 60% or 50% in April 2014. It might be further revised to 50% or 40%....

<original product>	Diovan® 80mg tablet	109.10 JPY
<generic product>	Valsartan 80mg tablet	54.60 JPY

50% (Price reduction)

Date: 26-07-2021

- Name of the Programme:** A Two-Day Webinar on “Research Methodology and Data Analysis”
- Dates:** 23-07-2021 and 24-07-2021
- Resource Person Details:**
- 1. Dr. T.E. Gopala Krishna Murthy,**
Principal & Professor
Bapatla College of Pharmacy, Bapatla
Email: drgkm@bcop.net
Contact Number: +91- 99123 42094
Topic: Opportunities and Constraints of Academic Research
 - 2. Dr. C V S Subrahmanyam,**
Principal
Gokaraju Rangaraju College of Pharmacy,
Hyderabad.
Email: cvssubrah@yahoo.co.in
Contact Number: +91- 9912342112
Topic: Interpretation of Results in Research
 - 3. Dr B. Prasanna**
Asst. Professor
Dravyaguna Department,
Dr. NRS Govt. Ayurvedic College,
Vijayawada
Email: dr.prasannarao408@gmail.com
Contact Number: +91-8008779191
Topic: Recent Advances in Ayurveda Research

4. Dr. Krishna Undela

Asst. Professor

Dept. of Pharmacy Practice, NIPER-G,
Guwahati, Assam.

Email: krishnaundela@gmail.com

Contact Number: +91-9986779870

Topic: Research Process: Identification and
Designing a Research Project

5. Dr. N. Srinivas

Statistician, Planning Dept.

Andhra Pradesh Capital Region
Development Authority (AP- CRDA, Govt.
of Andhra Pradesh.

Contact Number: +91- 9246472819

Topic: Statistics in Research-Data Analytics-
Statistical Computing

A two-day Webinar on **Research Methodology and Data Analysis** was organized by the Institution Innovation Council (IIC) of *Vijaya Institute of Pharmaceutical Sciences for Women* on 23rd and 24th July 2021. **Dr. T.E. Gopala Krishna Murthy**, Principal, Bapatla College of Pharmacy, **Dr. C V S Subrahmanyam**, Principal, Gokaraju Rangaraju College of Pharmacy, Hyderabad, **Dr B. Prasanna**, Asst. Professor, Dr. NRS Govt. Ayurvedic College, Vijayawada, **Dr. Krishna Undela**, Asst. Professor, Dept. of Pharmacy Practice, NIPER-G, Assam and **Dr. N. Srinivas**, Statistician, Planning Dept. Andhra Pradesh Capital Region Development Authority (AP- CRDA, Govt. of Andhra Pradesh) were invited as Guest Speakers. **Prof. Dr. K. Padmalatha**, Principal was the convener of the webinar; **Dr. S. Venkateswara Rao** and **Dr. Sivadasu Praveen** were the coordinators of the webinar.

Post inauguration on the first day **Dr. T.E. Gopala Krishna Murthy** delivered a talk on **Opportunities and Constraints of Academic Research**, where special emphasis was given on various opportunities and constraints in the academic research. By the end of the talk

VIJAYA INSTITUTE OF PHARMACEUTICAL SCIENCES FOR WOMEN

Permitted by Govt. of A.P; Approved by AICTE, New Delhi
Pharmacy Council of India, New Delhi & Affiliated to JNTUK, Kakinada
ISO 9001:2015 Certified Institution

students understood about the opportunities and the various problems faced by the researchers in the academic point of view.

The second talk was given by **Dr. C V S Subrahmanyam** on **Interpretation of Results in Research**. In this talk special emphasis was given on how to interpretate the results obtained in research in a detailed manner. Generally, people often simply summarize their results because they do not know how to interpret their findings. Interpretation of results is considered as an important step in the research process. Interpreting is about seeing whether the result confirms or does not confirm with the findings of previous studies in the literature review. The findings may also offer novel insights or information. By the end of the session students gained insights about interpreting the results obtained in a research work.

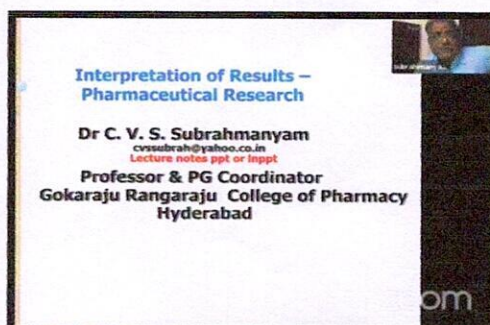

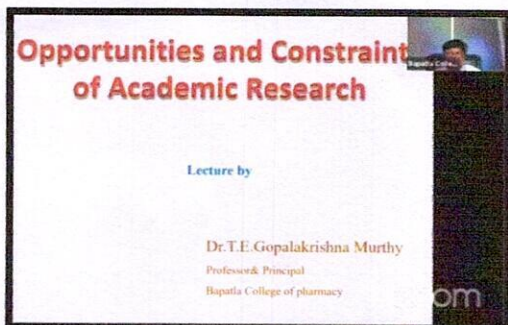

The last talk of the first day was given by **Dr B. Prasanna** on **Recent Advances in Ayurveda Research**. She spoke about the recent advancements that are happening in the field of Ayurveda. It is a science of life with a holistic approach to health and personalized medicine. It is one of the oldest medical systems, which comprises of thousands of medical concepts and hypotheses. Interestingly, Ayurveda has the ability to treat many chronic diseases such as cancer, diabetes, arthritis, and asthma, which are untreatable in modern medicine. Unfortunately, due to lack of scientific validation of various concepts, this precious gift is trailing. Hence, evidence-based research is highly needed for global recognition and acceptance which further needs advancements in research methodology. By the end of the session students gained knowledge about the recent developments in the field of Ayurveda.

On the second day **Dr. Krishna Undela's** talk on **Research Process: Identification and Designing a Research Project** gave importance to enlighten the students about how to identify a research work and design a research project. The function of a research design is to ensure that the evidence obtained enables to address the research problem as unambiguously as possible. In social sciences research, obtaining evidence relevant to the research problem generally entails specifying the type of evidence needed to test a theory, to evaluate a program, or to accurately describe a phenomenon. However, researchers can often begin their investigations far too early, before they have thought critically about what information is required to answer the study's research questions. Without attending to these design issues

first, the conclusions drawn being weak and unconvincing and, consequently, will fail to adequately address the overall research problem. By the end of the session students gained knowledge about how to identify a research problem and design a research project.

On the second day the final talk was given by **Dr. N. Srinivas** on **Statistics in Research-Data Analytics-Statistical Computing**. Various statistical tools that are used in the data analysis were explained evidently. It's the science of collecting, exploring and presenting large amounts of data to discover the underlying patterns and trends. Statistics are applied every day – in research, industry and government – to become more scientific about decisions that need to be made. By the end of the session, students understood about various tools that are used in analysing the data with live examples.

Vote of thanks was given by Dr. Sivadasu Praveen. 356 participants attended the webinar, and it was conducted through the online platforms of zoom and you tube.

Dr. B. Prasanna, speaking on
Recent advances in Ayurveda Research

REC LIVE

Research Process

Access and ethical issues

- Research involves issues of **confidentiality** and **anonymity** because participants are divulging information, often highly sensitive information, about themselves
- **Institutional Ethics Committee** approval
- **Regulatory Authority** approval

**Dr. Krishna Undela giving a talk on
Research Process: Identification and
Designing a Research Project on
24-07-2021**

REC LIVE

STATISTICS IN RESEARCH

- The role of statistics in research is to function as a **tool in designing research**, analysing its data and drawing conclusions there-from.
- Most research studies result in **large volume of raw data** which must be suitably reduced so that the same can be **read easily** and can be used **for further analysis**.
- **Classification and tabulation** are good advances towards achieving this objective. However, we have to go a step further and develop certain indices or measures to summarise the collected/classified data.
- Only after this we can adopt the process of generalization from small groups(samples) to population.

**Dr. N. Srinivas giving a talk on
Statistics in Research-Data
Analytics-Statistical Computing
on 24-07-2021**

VIJAYA INSTITUTE OF PHARMACEUTICAL SCIENCES FOR WOMEN

ENIKEPADU, VIJAYAWADA 521108

Date:09/09/2021

CIRCULAR

All the faculty and students of Pharm D are hereby informed to attend a one day international webinar on "Role of Induced Pluripotent Stem Cells in Drug Discovery" on 14/09/2021.

VIJAYA INSTITUTE OF PHARMACEUTICAL SCIENCES FOR WOMEN

Permitted by Govt. of A.P; Approved by AICTE, New Delhi
Pharmacy Council of India, New Delhi & Affiliated to JNTUK, Kakinada
ISO 9001:2015 Certified Institution

Date: 15.09.2021

AVRS – International Webinar

Name of the Programme	“A Webinar On Role of Induced Pluripotent Stem Cells in Drug Discovery”
Date	14.09.2021.
Resource Person Details	Dr. Narasimman Gurusamy M.Pharm., Ph.D., Research Assistant Professor Department of Bioscience Research University of Tennessee Health Science Center Memphis, TN 38163, USA.
Topic covered	Topic: Role of Induced Pluripotent Stem Cells in Drug Discovery Date & Time: 10:30 am to 12:30 am & 14/09/2021 i.e. Tuesday.

“A Webinar on Role of Induced Pluripotent Stem Cells in Drug Discovery”, was organized by *Vijaya Institute of Pharmaceutical Sciences for Women* on 14th September 2021.

Dr. Narasimman Gurusamy, Research Assistant Professor, Department of Bioscience Research, University of Tennessee Health Science Center, Memphis, TN 38163, USA was the Invited Speaker. **Prof. Dr. K. Padmalatha**, Principal was the convener of the webinar and **Dr. P. Selvam**, President, AVRS was the coordinator of the webinar.

The webinar was inaugurated by **Mrs. V. Vishnu Vandana Devi** and the keynote address was delivered by **Dr. P. Selvam**.

Antiviral Research Society in association with Vijaya Institute of Pharmaceutical Sciences for Women organized an International Webinar on 14-09-2021 from 10.30 am to 12.30 pm.

Dr. K. Padmalatha, Principal, VIPW in her inaugural address welcomed the delegates and emphasized the importance of establishing a Research & Development Cell at the institution which takes up studies and investigations on current trends of interest in the field of Pharmacy.

Dr. Narasimman Gurusamy, Research Assistant Professor, Department of Bioscience Research, University of Tennessee Health Science Center, Memphis, TN 38163, USA was the Invited Speaker at the webinar whose talk focused on “Role of Induced Pluripotent Stem Cells in Drug Discovery”. Research on Stem Cells and derived products is a promising study for new medical treatments. It is quite an apt topic to choose to learn about stem cells, current and possible uses and the scenario of research and practice in drug discovery.

The Embryonic stem cells resulting in pluripotent stem cells can divide into more stem cells or can take the form of any type of cell in the body. Further, they can be used to regenerate or repair the diseased tissue or organ.

Dr. Purushothama Reddy K, Head, Department of Pharmacy Practice on behalf of the institution presented vote of thanks, before which there was a question and answer session.

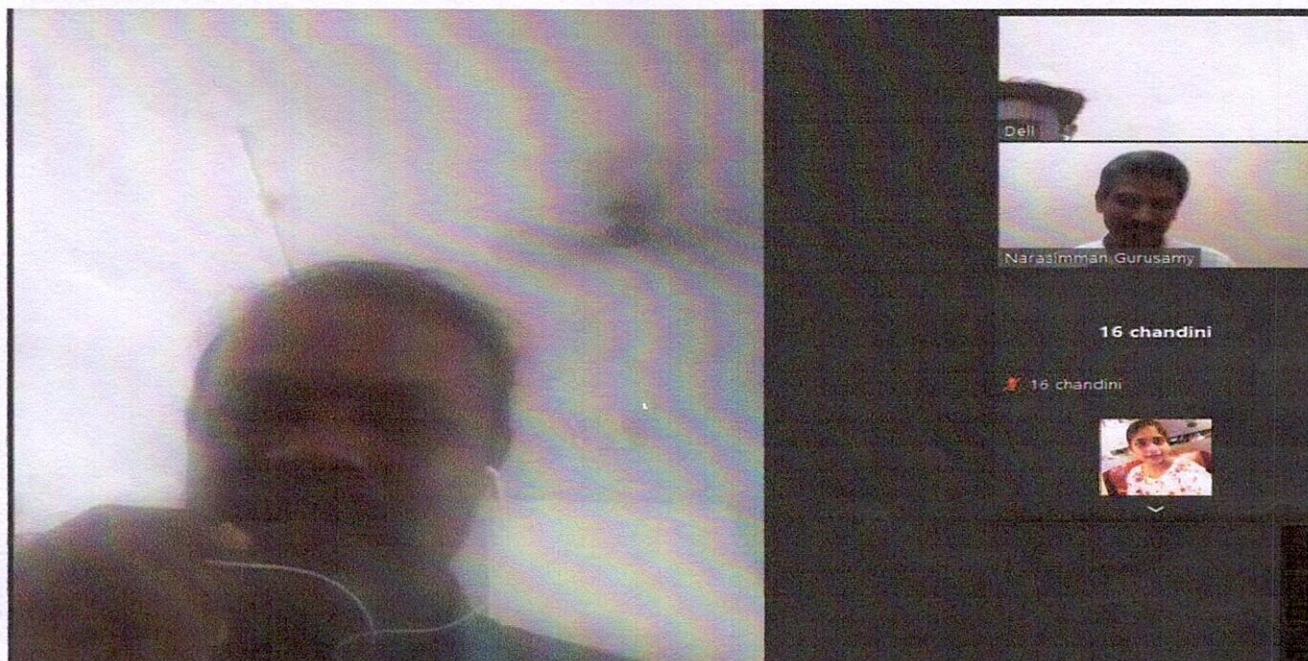

Dr. P. Selvam, President, AVRS delivered the valedictory address. There were 100 participants who derived new insights from the webinar and it was conducted through the online platforms of zoom and you tube.

Dr. Narasimman Gurusamy giving a talk on “**Role of Induced Pluripotent Stem Cells in Drug Discovery**” on 14th September 2021.

Application of organoids derived from iPSCs to disease modelling and drug discovery

The diagram illustrates the workflow for generating organoids from patient-specific iPSCs. It begins with a patient, from whom skin biopsies, blood samples, and liver biopsies are collected to obtain fibroblasts. These fibroblasts are used to generate patient-specific iPSCs. These iPSCs are then differentiated into disease organoids. These organoids are used for drug screening and disease correction. The process also involves target validation and drug delivery.

Summary

The summary diagram shows the application of iPSCs in drug therapy and cell therapy. It includes drug testing, disease modelling in vitro, high throughput drug screening, disease modelling in vivo, cells of interest, disease modelling in vivo, patient specific iPSCs, drug screening, disease correction, repaired iPSCs, cells of interest, in vivo engagement and function, and in vivo safety and efficacy.
