Campus Recruitment Training (C R T)

For the Vijaya Institute of Pharmaceutical Sciences for Women Students:

Campus Recruitment Training (C R T) is a specially designed campus interview module for pre-final and final year graduate students. Our teams of experts have studied the recruitment process of Industries such as *Pharma, IT, ITeS, Banking, Telecom, Automobile, FMCG, and Hotel*, and have used this to design a curriculum which will help your students be better prepared for their placement process.

As the students near the end of their course, their technical acumen would have been perfected by their college. Students now need to hone their aptitude and personality. To navigate the hurdles of the various methods in selection process like Psychometric test, M.R Round, Extempore, JAM, Mock Press, GD and PI, aspirants must know the process and what is required. Campus Recruitment Training (C R T), from *Future Wise's* program helps you:

- ❖ To assist the learner identify, analyze, introspect and understand one's own personality traits so that they can answer confidently and concisely with complete understanding.
- ❖ To give the learner a platform to express their ideas freely, listen to others patiently, come forward with rational ideas and emerge as a well rounded personality.
- ❖ To help students outline the purpose of presentation, understand the group's needs, establish rapport with the group, maintain poise and answer queries convincingly.
- ❖ To equip learners with skills that help them conduct themselves appropriately and bring in a holistic change in them to face the world with confidence.
- ❖ To empower the students with enhanced vocabulary and help them to handle complex situations through apt and impressive expressions.

PROGRAMME OBJECTIVES :

Statistical Analysis System (SAS), a software system for data analysis and report writing. SAS is a group of computer programs that work together to store data values and retrieve them, modify data, compute simple and complex statistical analyses, and create reports. SAS can be used through the SAS Analyst drop down menus, or by writing one's own code for maximum flexibility in performing complex analyses.

1. Role of SAS programmers in Clinical Research.
2. Data validation techniques using SAS
3. Integrate Clinical SAS Data and Metadata
4. Data transformations
5. Advanced concepts including SAS SQL, SAS GRAPH.

Clinlogics is an innovative educational and training institute was established in 2017 in Visakhapatnam, Andhra Pradesh and is recognized by the Govt. Our vision is that Clinlogics will be the natural choice for superior skilled education and innovative learning. Our Mission is to offer advanced education to students through comprehensive and job oriented academic courses with enhanced technology, resolute interdisciplinary loom with comprehensive reach, state-of-the art research intellects, scholarly quest, and pertinent industry involvement. Clinlogics will be an indispensable contributor to high quality education that meets the needs of the current industry. We visualize Clinlogics as an abode in the academic world where training and Industry needs converge closer for reciprocal and constructive benefits. Our faculties are professionals have vast experience in Statistical Analysis System (SAS), Pharmacovigilance, Clinical Research and Medical Coding and they trained the students with a career oriented and student-friendly approach.

Clinlogics is associated with **Vijaya Institute of Pharmaceutical Sciences for Women (VIPW) since 2017. Dr. Padmalatha (Principal)** has been a guiding light and source of encouragement for us to continue our training program all these years. She provides all the required instructions and requirements to run the program successfully. B. Pharmacy final year students are being rigorously trained on **Statistical Analysis System (SAS) and Pharmacovigilance** for a period of two months i.e. **1st August 2017 to 30th September 2017**. Classes are taken regularly and students are provided with in depth knowledge and understanding on the course topics. The mode of teaching is through PowerPoint presentations and black board is used when required. Students are advised to maintain proper notes and material is provided when needed. Attendance of students is strictly monitored and personal attention is paid towards the progress of students. Regular assessments to test the understanding of students are also conducted. During the course, students are updated with job openings and are kept motivated throughout the entire period. At the end of course, resume writing, job guidance and mock interviews are conducted to prepare the students for interviews. We also offer job assistance and guidance post completion of the curriculum. The detailed course curriculum for SAS and Pharmacovigilance is provided below.

Curriculum Design for Statistical Analysis System (SAS):

S.No.	Topics	Hours
1	Introduction to Clinical Research process, Drug Development process, Phases of Clinical Research, Industry regulations and standards for Clinical Trials, Departments and roles in a CRO	2
2	History and Introduction to SAS, Role of Statistical Analysis in Clinical Research Study, SAS role in Clinical Research Study, Protocol study, Randomization and Non-randomization, SOP, About DBMS, CDM, SAP in Clinical Research Study	2
3	SAS work flow in Clinical Research Study, Relation between SAS and DBMS, SAS with CDM, CDISC Data models (SDTM, ADM etc.), SAS Report generation in Clinical Research Study	2
4	SAS system overview, working in the SAS environment, Basics of SAS including data and proc step, structure of the data set, variables and attributes, basic rules of writing SAS programs, basic rules to define variable and data set names, SAS windows, keyboard shortcuts	2
5	Reading raw data using Input Styles (List, Modifiers of List, Column)	2
6	Reading raw data using Input Styles (Format with pointer controls including column pointer control, line pointer control and line hold pointer control, Mixed and Named input styles)	2
7	SAS system options, Title and footnote statements, comments	2
8	Data Step processing (PDV, Debugging SAS Code, Error, Warning, Notes in SAS log)	2
9	Referencing a SAS data library using libname statement, reading external files and engines using filename statement (clipboard, DDE, Excel, Access)	2
10	Reading external file (notepad) using INFILE statement with options, writing data to external sources using file and put statements	2
11	Importing data using PROC IMPORT (Delimited files including comma, blank etc., reading Microsoft excel files including .xls, xlsx, csv, reading Microsoft access files including .MDB, .ACCDB)	2
12	Exporting data using PROC EXPORT (Delimited files including comma, blank etc., reading Microsoft excel files including .xls, xlsx, csv, reading Microsoft access files including .MDB, .ACCDB)	2
13	Print procedure with options and statements	2
14	Sort procedure with options for sorting and eliminating duplicate observations	2
15	Pre-defined informats and formats (character, numeric, reading date and time)	2
16	Proc format for creating user defined informats and formats (character, numeric, date and time), managing SAS catalogs	2
17	Conditional statements in SAS (if, if then else, if then do else, select when, select when do)	2
18	Where condition, Operators in SAS (Mathematical, Comparison and logical)	2
19	Generating data with loops (do, do while, do until)	2
20	Processing variables with arrays (group variables into one dimensional, two dimensional), temporary arrays, assigning initial values, creating new variables using arrays	2
21	SAS Functions (Character)	2
22	SAS Functions (Numeric, Statistical, Arithmetic, truncation and Special)	2
23	SAS Functions (Date and time)	2
24	Merging SAS datasets (one to one, concatenating, inter-leaving, simple merge, match merge, update, append)	2

Clinlogics Academy, Visakhapatnam organized a certificate program on **Statistical Analysis System (SAS)** for IVth B. Pharmacy students by the resource person **Mr. Varaha Kumar** from 1st August 2017 to 30th September 2017. This program is designed to provide knowledge on clinical trial data analysis using SAS. Totally 71 students participated in this training program. All the students were enthusiastic and upon completion of the program they were able to understand the following objectives and learning outcomes.

Objectives:

1. Role of SAS programmers in clinical research.
2. Advanced concepts including SAS SQL, SAS Macros, SAS STAT, SAS ACCESS, SAS GRAPH, SAS ODS.
3. Enhance table relationships using indexes, views and integrity constraints.
4. Data transformations.
5. Data validation techniques using SAS.
6. Integrate Clinical SAS Data and Metadata.

Learning Outcomes:

1. Acquire proficient programming skills that are required in Clinical SAS.
2. Able to write SAS programs and SAS environment in windows.
3. Creating SAS datasets using different SAS statements and data importing methods.
4. Understanding data step processing.

5. Data validation techniques using SAS.
6. Basic knowledge on CDISC including SDTM, AdAM and ODM.
7. Acquire related positions and Jobs in the Industry.

This program was very much informative and useful to the students and their feedback was positive about the program. Dr. K. Padmalatha, Principal of VIPW appreciated the resource person Mr. Varaha Kumar and participants.

Clinlogics is an innovative educational and training institute was established in 2017 in Visakhapatnam, Andhra Pradesh and is recognized by the Govt. Our vision is that Clinlogics will be the natural choice for superior skilled education and innovative learning. Our Mission is to offer advanced education to students through comprehensive and job oriented academic courses with enhanced technology, resolute interdisciplinary loom with comprehensive reach, state-of-the art research intellects, scholarly quest, and pertinent industry involvement. Clinlogics will be an indispensable contributor to high quality education that meets the needs of the current industry. We visualize Clinlogics as an abode in the academic world where training and Industry needs converge closer for reciprocal and constructive benefits. Our faculties are professionals have vast experience in Statistical Analysis System (SAS), Pharmacovigilance, Clinical Research and Medical Coding and they trained the students with a career oriented and student-friendly approach.

Clinlogics is associated with **Vijaya Institute of Pharmaceutical Sciences for Women (VIPW) since 2017. Dr. Padmalatha (Principal)** has been a guiding light and source of encouragement for us to continue our training program all these years. She provides all the required instructions and requirements to run the program successfully. B. Pharmacy final year students are being rigorously trained on **Statistical Analysis System (SAS) and Pharmacovigilance** for a period of two months i.e. **1st August 2017 to 30th September 2017**. Classes are taken regularly and students are provided with in depth knowledge and understanding on the course topics. The mode of teaching is through PowerPoint presentations and black board is used when required. Students are advised to maintain proper notes and material is provided when needed. Attendance of students is strictly monitored and personal attention is paid towards the progress of students. Regular assessments to test the understanding of students are also conducted. During the course, students are updated with job openings and are kept motivated throughout the entire period. At the end of course, resume writing, job guidance and mock interviews are conducted to prepare the students for interviews. We also offer job assistance and guidance post completion of the curriculum. The detailed course curriculum for SAS and Pharmacovigilance is provided below.

Clinlogics Academy, Visakhapatnam organized a certificate program on **Pharmacovigilance (PV)** for IVth B. Pharmacy students by the resource person on every saturday and sunday from 1st August 2017 to 30th September 2017. This program is designed to assess whether the benefits of a drug outweigh the risks and it doesn't stop after the drugs are certified. PV involves ongoing monitoring of drugs to ensure their safety for use, especially since previously undetected adverse effects can occur at any time. Totally 71 students participated in this training course. All the students participated actively. After the completion of the program, students were able to understand the following objectives and learning outcomes.

Objectives:

1. Understand drug safety, history and evolution of pharmacovigilance, the role of health authorities and their guidelines.
2. Processing of individual case safety reports (ICSRs).
3. Databases used for case processing.
4. Understand aggregate reports and signal detection.

Learning Outcomes:

1. Define pharmacovigilance and its history.
2. Classify ICSR and complete reporting forms.
3. Process cases in safety database.

PROGRAMME OBJECTIVES :

Advances in Pharmaceutical drug delivery technologies enhance drug absorption, efficacy, and patient experience. When combined with appropriate targeting moieties, drug-coated nanoparticles, drug-encapsulating liposomes and nanotubes, and tree-like dendrimers enable organ and tissue targeting. This program was designed to improve the knowledge on the area of novel drug delivery systems and technology.

1. Principle & approaches for development of various advanced drug delivery systems
2. Criteria for selection of drugs and polymers for the development of novel drug delivery systems, their formulation and evaluation
3. Various new technology used in Pharmaceutical industries.

Vijaya Institute of Pharmaceutical Sciences for Women, Enikepadu, Vijayawada organized a add on program on **Advances in Pharmaceutical Drug Delivery and Technology** for M. Pharmacy students by **Dr. B. Ramu**, Professor, Department of Pharmaceutics and **Mr. S. Venkateswara Rao**, Associate Professor, Department of Pharmaceutics from 13th June 2017 to 24th June 2017. This program enables the student to understand the various novel drug delivery systems and appreciate the influence of new technology on the performance of the drug product. Totally 21 students participated in this training program. Upon completion of the program the students were able to understand the following objectives and learning outcomes.

Objectives

- Understand the formulation and evaluation of novel drug delivery systems.
- Understand the principle involved in formulation of various advanced drug delivery systems.
- Understand the criteria for selection of drugs and polymers for the development of novel drug delivery systems, their formulation and evaluation.
- Understand various approaches for development of novel drug delivery systems.
- Understand various new technologies used in pharmaceutical industries.

Learning outcomes

- Know various considerations in development of advanced drug delivery systems.
- Formulate pulmonary drug delivery systems, gastro-retentive drug delivery systems, floating micro balloons, magnetic drug delivery systems and evaluate them for their quality.
- Know the various new technologies used in pharmaceutical industries.
- Know the pilot plant scale up techniques.
- Know the formulation aspects of different advanced drug delivery systems.

This program was very much informative to the students and their feedback was positive about the program. The management and Dr. K. Padmalatha, Principal of VIPW thanked the resource persons Dr. B. Ramu, Mr. S. Venkateswara Rao and participants for making the program successful.

PROGRAMME OBJECTIVES :

This program introduces the schematics of Methods Development and Validation with a grassroots, conceptual standpoint, based on scientific rationale and a Method by Design approach. The aim is to lead the audience to the understanding, basic elements of analytical method, with a focus on Quality. At the outset, it implores the analytical chemist to grasp an Analytical Method as a process of measurement.

1. To get knowledge about development and optimization of chromatographic methods.
2. Study about importance of system suitability parameters in chromatographic methods.
3. To get up to date with the ICH and US FDA guidelines for the analytical method validation parameters.

Objectives

- To understand the development of analytical methods by using chromatographic methods.
- To learn about the system suitability parameters and their significance.
- To become aware of analytical method validation parameters, ICH and FDA guidelines for method validation.

Learning outcomes

- Logical view on how to develop analytical methods.
- Key factors affecting method development and how to optimize the method.

PROGRAMME OBJECTIVES :

Research design is needed because it facilitates the smooth sailing of the various research operations, thereby making research as efficient as possible yielding maximal information with minimal expenditure of effort, time and money.

1. Critical steps for successful research.
2. Research and publication ethics.
3. Assessment of research findings in scientific journal
