Indo-African Seminar on **Advances in Pharmaceutical Sciences and Technology** was organized at *Vijaya Institute of Pharmaceutical Sciences for Women* on 07-09-2018. The seminar was conducted in association with the Association of Pharmacy Professionals Ethiopian and Andhra Pradesh Branches. Dr. Suresh V. Chennupati, Vice-President, APP Ethiopian International Branch, Dr. Subas Chandra Dinda President, APP, Ethiopian International Branch and Dr. Sudhakar Sagaram, Assoc. Professor, Wollega University, Nekemte, Ethiopia were the Guest of Honour. Seminar has started with the inaugural function followed by key note address given by Dr. Suresh. V. Chennupati.

Post tea Dr. Subas Chandra Dinda had delivered a talk on **Nanotheranostics and its Toxicity Concerns in Drug Targeting**. Nanotheranostics, the integration of diagnostic and therapeutic function in one system using the benefits of nanotechnology, is extremely attractive for personalized medicine. Because treating cancer is not a one-size-fits-all scenario, it requires therapy to be adapted to the patient's specific biomolecules. Personalized and precision medicine (PM) does just that. It identifies biomarkers to gain an understanding of the diagnosis and in turn treating the specific disorder based on the precise diagnosis. By predominantly utilizing the unique properties of nanoparticles to achieve biomarker identification and drug delivery, nanotheranostics can be applied to noninvasively discover and target image biomarkers and further deliver treatment based on the biomarker distribution. By the end of the session delegates understood about the biomedical applications of Nanotheranostics.

Followed by Dr. Sudhakar Sagaram's presentation on **Indian Pharmaceutical Industry and its Potential in terms of Opportunities and Challenges in Data Management**. The era of globalization has helped many Indian Pharma companies to expand operations beyond home turf. Changes in regulatory, patent and market trends will drive opportunities for generic drugs and hence very big opportunities for Indian pharmaceutical companies in global markets. India is the largest manufacturer and exporter of generic drugs in the world and considered as the pharmacy of the world. However many Indian pharma companies find it difficult to survive in global markets due to the competition, lack of market knowledge, complex regulatory pathway and

not embracing the latest digital technologies adopted by global companies. By the end of session delegates understood about the need of digitalizing the data and managing the data,

Dr. A. Lakshmana Rao has delivered a talk on **Natural Product Based Research- A Promising Outcome** and delegates gained knowledge about the various aspects of research regarding natural products. Post lunch students presented their scientific works. In the valedictory session distribution of certificates were distributed to the participant and prizes to the winners. An overwhelming response was obtained and 736 participants attended the seminar including research scholars, PG, UG students, and teaching staff of various colleges.

Email: gaganasahasra@gmail.com

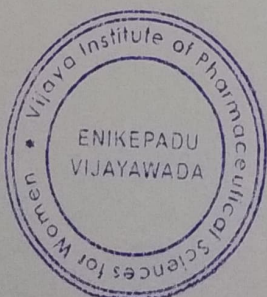

Contact Number: +91 -9989713626

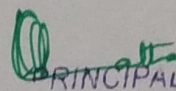

Topics Covered:

1. Concept of Entrepreneurship
Development
2. Role of Entrepreneurship on Economic
Development

A Seminar on **Entrepreneurship Development** was conducted on 07-12-2018 by *Vijaya Institute of Pharmaceutical Sciences for Women*. After the inaugural address by the convener and Principal, Prof. K. Padmalatha, Mrs. V. Vandana, Assoc. Prof., Science & Humanities introduced the guests to the audience. The resource persons of the day were, Dr. M. Veerabhadra Rao, Professor, SRK Institute of Technology, Vijayawada and Mrs. G. Madhu Sri Assoc. Professor, Vijaya Institute of Technology for Women, Vijayawada.

Dr. M. Veerabhadra Rao's presentation was on the **Concept of Entrepreneurship Development**. Entrepreneurship is the process whereby an individual or group of individuals use organized efforts to pursue opportunities to create value and grow by fulfilling wants and needs through innovation and uniqueness regardless of personal resource situation. By the end of the talk students gained knowledge about basic concepts of entrepreneurship and how they can excel in their careers by starting their own companies in their chosen field.

Post tea break Mrs. G. Madhu Sri addressed the audience on **Role of Entrepreneurship on Economic Development**. The role of entrepreneurship in economic development varies from economy to economy depending upon its material resources, industrial climate and the responsiveness of the political system to the entrepreneurial function. Path breaking offerings by entrepreneurs, in the form of new goods & services, result in new employment, which can produce a cascading effect or virtuous circle in the economy. If we understand the benefits and drawbacks, a balanced approach to nurturing entrepreneurship will definitely result in a positive impact on economy and society. By the end of the talk students gained knowledge about how entrepreneurship will play a significant role in the development of the economy of a country. Followed by the technical sessions, a Q and A session was conducted and vote of thanks was given by Mrs. V. Vandana. An overwhelming response was obtained as 156 participants attended the seminar.

Mrs. G. Sundari delivered a lecture on **How to Write a Thesis Statement for a Research Paper**, a thesis statement comprises one or two declarative sentences that summarize the main point of a paper or a piece of writing such as an essay. A thesis statement identifies the topic to be discussed, as well as the purpose of the paper itself. Most importantly, a study's thesis statement clearly makes an assertion and communicates to the reader the position the author has taken on the topic. By the end of the talk students gained knowledge about different concepts they have to understand before starting research work.

Post tea-break, Dr. V. Raghava Lakshmi, made a power point presentation on **Research Methodology: How to Analyze Qualitative Data**. Data analysis is one of the most important, yet least understood, stages of the qualitative research process. Through rigorous analysis, data can illuminate the complexity of human behaviour, inform interventions, and give voice to people's lived experiences. While significant progress has been made in advancing the rigor of qualitative analysis, the process often remains nebulous. By the end of the session students understood how to present the research work in a structured manner, followed by scientific a Q & A session, where the resource persons answered the queries of students and staff. Vote of thanks was presented by Mrs. V. Vandana. 151 participants attended the seminar and it was a huge success.
